

Abstract

A rack (10) intended in use to be supported from an upstanding support, the rack comprising a base (12) adapted to be fixed to the support, a support member (14) connected to the base to be pivotable about a first axis which is generally level, to be moveable between a first position, at which it is adjacent to the support and a second position at which it extends laterally from the support, the support member being adapted to receive and support an item when in its second position.
